Menambahkan margin atas dan padding horizontal dan Mengatur tampilan produk agar tersebar secara horizontal dengan flexbox dan responsif.

A screenshot of a code editor window with a dark background and a light blue header and footer. The code is written in a light blue font. It shows a nested div structure for a flexbox layout. The outer div has a className of "mt-12 px-4". The inner div has a className of "flex justify-around flex-wrap". There is a comment "//coding disini" inside the inner div. The code is as follows:

```
<div className="mt-12 px-4">
  <div className="flex justify-around flex-wrap">
    //coding disini
  </div>
</div>
```
